

CSM 50

PALLET WRAPPER

CYKLOP[®]
GLOBAL PACKAGING SOLUTIONS

STRAPPING
WRAPPING
CODING
TAPING

The CSM 50 is a semi-automatic, mobile pallet wrapper. This machine can be used even if the number of pallets to be wrapped per day is low. The CSM 50 can be used to stabilise large and heavy loads and loads with an irregular shape, with wrapping film.

The CSM 50 replaces heavy and burdensome “manual wrapping” at an affordable price. The machine is light and easy to move manually. The film carriage simply goes up and down without electric motor as the machine is moved forwards and backwards. The employee no longer needs to lift the film or stoop around the pallet.

Ergonomic responsible!

By working with pre-stretched film you also get a very tight and professionally wrapped pallet.

Benefits

- Compact machine
- Working with pre-stretched film is cost effective
- Semi-automatic, not motor-driven
- Ergonomic responsible
- Replaces hand wrapping
- Easy to use
- Flexible
- For use in a ATEX environment
